

MURTAZA MALIK

Full-Stack Developer — React, Next.js, Node.js, Python

📍 Jammu & Kashmir, India 📞 +91 6005034491 ✉ murtazabaanihali@gmail.com 🌐 [dhem.io](#)

SUMMARY

Full-Stack Developer with 5+ years of programming experience and 3+ years of professional freelancing. Self-taught since 2021, I work end-to-end—scoping, UX, architecture, development, and deployment—and have shipped multiple production platforms that are live today: **iReplyy** (social-media automation), **Dhesend** (transactional email API with published Node.js & Python SDKs), **DheGEN** (AI content suite), and **Badr** (streaming platform with full-text search and AI classification). Maintains a **5.0/5.0 freelance rating with 100% on-time and on-budget delivery**. Strong on clean, typed code (TypeScript), performance, and resilient infrastructure (AWS, Docker, Redis, PostgreSQL).

TECHNICAL SKILLS

Frontend:	React, Next.js, TypeScript, JavaScript (ES6+), Redux, Zustand, React Query, Tailwind CSS, shadcn/ui, Three.js
Backend:	Node.js, Express.js, Bun, Python, Django, DRF, FastAPI, Flask, REST APIs, WebSockets
Mobile:	React Native, Expo, Capacitor (Android / iOS)
Databases:	PostgreSQL (incl. Neon), MySQL, MongoDB, SQLite, Redis, Prisma, Drizzle ORM
Cloud & DevOps:	AWS (EC2, S3, SES, SNS, SQS, Lambda), Cloudflare Workers, Vercel, Render, Supabase, Docker, CI/CD, Nginx
AI & Search:	OpenAI, Anthropic Claude, DeepSeek, OpenRouter, Replicate, Manticore Search, prompt engineering & AI integration
Other:	Git, GitHub/GitLab, RabbitMQ, BullMQ, OAuth & webhooks (Meta, Google), Logto / Zitadel (self-hosted auth), Arch Linux (daily driver)

EXPERIENCE

Freelance Full-Stack Developer — Self-employed

Aug 2023 – Present

Remote · Clients in India and international markets · [freelancer.com/u/murtaza4491](#)

- Deliver end-to-end web, mobile, and desktop solutions across the full SDLC—scoping, architecture, coding, deployment, and maintenance.
- Maintain a **5.0/5.0 rating with 100% on-time, 100% on-budget, and 100% accept rate** on Freelancer.com since joining in 2023.
- Resolved production VPS infrastructure issues (Hostinger) and delivered debugging, performance optimization, and reliability fixes for client web apps.
- Built Python automation and scraping solutions, API development, legacy-code modernization, and DevOps support; developed a production laundry-management application for a client.

Founder & Full-Stack Developer — iReplyy

May 2025 – Aug 2025

India · In production: [ireplyy.com](#) · Stack: Next.js, PostgreSQL, Redis, Supabase, Upstash, Meta Developer API

- Founded and single-handedly built iReplyy, an AI-powered automation SaaS that auto-replies to comments and DMs across **Instagram, Facebook Pages, Messenger, WhatsApp, and Telegram** (X and TikTok integration planned).
- Engineered a scalable real-time backend pipeline for trigger-based workflows, keyword rules, smart AI replies, broadcasts, contact tracking, and activity logging—achieving **sub-5-second automated response times**.
- Built an All-in-One Inbox and a high-performance dashboard (automations, contacts, live chat, activity analytics) for managing all connected platforms from a single interface.
- Integrated OAuth, platform APIs, webhooks, and safe rate-limit handling; optimized onboarding, UX, and reliability for high-volume automation with unlimited account connections.

Full-Stack Developer — Breathings App (client project)

Nov 2024 – Feb 2025

Remote · Production mobile app · Stack: React Native, Expo, Django, DRF

- Built a cross-platform wellness app (guided breathing, meditation sessions, live audio streaming) with React Native + Expo and a Django + DRF backend.
- Developed authentication, personalized stats, session tracking, and content-delivery APIs; integrated social login and analytics with performance-focused API design.
- Shipped polished onboarding, mood-tracking, and meditation-library flows with optimized state management and improved load times.

PRODUCTION PROJECTS (SELECTED)

Dhesend — Transactional Email API Platform

Dec 2024 – Present

[dhesend.vercel.app](#) · Stack: Next.js, Express.js, TypeScript, AWS SES/SNS/SQS/Lambda, PostgreSQL, Drizzle ORM, Redis, Vercel, Render

- Designed and shipped a developer-focused transactional email platform with domain management & verification, API keys, webhooks, delivery metrics, and full email-activity logging.
- Architected a serverless delivery pipeline on **AWS SES + SNS + SQS with a Lambda queue processor**, PostgreSQL (Drizzle ORM), and Redis caching/queuing with Helmet security hardening.
- Published official **Node.js and Python SDKs** ([npm_dhesend](#), [PyPI_dhesend](#)) plus **10+ integration examples** (Next.js App & Pages Router, Express, Bun, Hono, Django, FastAPI, Flask); wrote full docs and API reference.

DheGEN — AI Content Creation Platform

Sep 2024 – Present

[dhegen.dhem.io](#) · Stack: Next.js, TypeScript, PostgreSQL, Redis, BullMQ, AWS Amplify, Supabase, Upstash, Capacitor

- Built a production AI suite with **six tools**: GenGPT chat, text-to-image generation, photo maker, face swap, and video face swap—all in one dashboard with a credits/billing system and usage tracking.
- Integrated multiple AI models/pipelines with progress states, history tracking, and real-time output rendering; used Redis caching and BullMQ email queuing to optimize heavy AI workloads.
- Developed the full product line: main platform, a dedicated **admin panel**, and an **Android mobile app** (Capacitor).

Dhem Org / Badr — Streaming Platform + Unified API Server

2026

Stack: Bun, Express.js 5, TypeScript, PostgreSQL (Neon), Drizzle ORM, Redis (Upstash), Logto, Manticore Search, OpenRouter

- Built **Badr**, an Islamic streaming platform featuring content-scraping pipelines, full-text search (Manticore), and AI-driven content classification (OpenRouter).
- Architected a central Express.js API server for the organization—one unified account and billing system across products—with Redis rate-limiting, self-hosted Logto authentication, and PostgreSQL via Drizzle.

Healthcare Resume Builder — AI resume builder for doctors

2025

Stack: Next.js, TypeScript · Live: [resumebuilder.dhem.io](#)

- Built a resume builder for medical professionals with AI-assisted writing and description improvement tailored to healthcare roles.

@baanihali/captcha — Open-source CAPTCHA package (npm)

2025

[npmjs.com/package/@baanihali/captcha](#) · Stack: React, TypeScript, Node.js, sharp

- Published a customizable sliding-puzzle CAPTCHA for React projects with **server-side validation, replay-attack protection, and unique captcha IDs**; integrates with React, Next.js, Express, and NestJS.
- Built a WASM-based variant ([@baanihali/captcha-workers](#)) for Cloudflare Workers/serverless edge runtimes with no native dependencies.

3D Portfolio Website & Utilities

2025

Stack: React, Three.js / React Three Fiber, TypeScript · [murtazabaanihali.vercel.app](#)

Open-source tools: site-diff-checker, YouTube channel blocker (Python), malware detection (Python)

- Designed an immersive, interactive 3D portfolio with custom Three.js scenes, responsive layout, and fast performance; built and published several smaller open-source utilities.

SELF-DIRECTED LEARNING & EARLY PROJECTS

Full-Stack Development Foundations

2021 – 2023

- Self-taught web development from first principles; built foundational skills in JavaScript, TypeScript, React, Node.js, and Python through hands-on projects.
- Studied and forked open-source codebases (devcaptcha, umami analytics) to learn architecture and security patterns.
- Built early utility projects including a Python-based YouTube channel blocker for kids and a Python malware-detection tool.
- Created reusable starter templates (React + Webpack + Tailwind + TypeScript, Express + TypeScript) used to accelerate client project setups.

EDUCATION

Senior Secondary (Class XII) — **National Institute of Open Schooling (NIOS)**, India

LANGUAGES

English, Hindi, Urdu (all fluent)
